

CONSOLE

DATA IS VALUABLE. REAL-TIME DATA IS PRICELESS.

The Outerlink Console gives users a fleet perspective, providing an interactive tracking and dispatching platform for all of your communication needs and delivering on-demand, actionable data to your dispatch or billing centers.

KEY FEATURES

REAL-TIME AIRCRAFT STATUS

Real-time tracking and a dashboard that displays cautions and warnings and up to 3 customizable labels of choice - pitch, roll, fuel, torque and TOT

RELIABLE COMMUNICATION

Push-to-Talk Voice over the Outerlink IRIS IP radio allows users to create talk groups and communicate with one aircraft or their entire fleet; a proven form of communication during natural disasters when VHF towers have been damaged or are inoperable

SMART WALL

Up to 9 different customizable layouts, displaying aircraft or cameras

CUSTOMIZABLE ALERTS

Customizable alerts, configured to display on the map; send an email or text message

MAP OVERLAYS

Map includes overlays for precipitation, pressure, wind, flight chart sectional, temperature, waves, radar for US and Canada, TFR, METAR and TAF

REPORTING AND ANALYTICS

View or export reports as CSV, Excel, XML or KML files

SECURITY

Secured by 256-bit Advanced Encryption Standard (AES256) to avoid cyber threats
